CHOHO CHAINS

INTRODUCTION

Qingdao CHOHO Industrial Company Ltd is a large manufacturer specialising in chains. It is a member of the national technology committee for standardization within the chain transmission industry. Choho chains have been sold to over 30 provinces in Mainland China. Also in Japan, Europe, North America, and many South-East Asian Countries.

SCIENTIFIC MANAGEMENT

Qingdao CHOHO adopts a strict manufacturing process derived from Japan. Qingdao CHOHO endeavors to manufacture under a standardised quality system. Qingdao CHOHO has been certified in both ISO9001:2000 (2003) and TS1649 (2007) and received Quality Systems Certifications.

ADVANCED PRODUCT DESIGN AND MANUFACTURING TECHNOLOGY

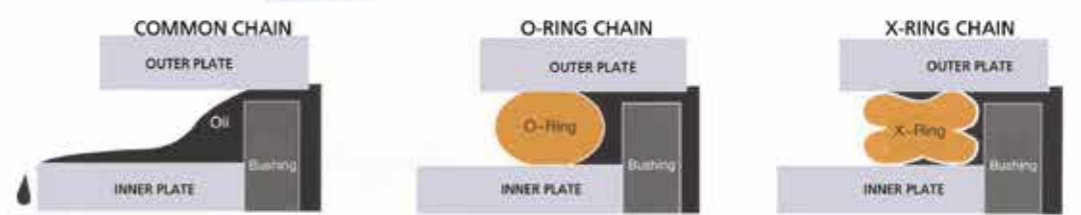

Qingdao Choho adopts advanced Japanese designs and manufacturing technology. The pressure and wearing status of the chains are analysed by computer so that precise configuration of parts and dimensions insure the chains under all situations of pressure and anti-wearing. The advanced technologies which consist of ball extruding, short-peening, carbonitriding of pins, chain phosphating, assembly of bushing, pre stressing, running in machines and twisting correction insure the chains with high performance and longer life.

CHOHO CHAINS

X-Ring Chain
 OPTIONAL MODELS
 428XH 520HX 525HX 530HX

The oil or the grease of the common chain is easily overflowed. The lubricant oil outlet of O-Ring chain. The lubricant oil outlet of X-Ring chain.

Chroming Craft: There is a Cr-V alloy-metal extending coating on the spare parts' surface, it can be high hardness; anti-coming off; anti-wearing; anti-high temperature; anti-corruption.
Ball drift: The plate holes are finally ball-burnished to assure maximum resistance to fatigue failure.
Shot peened parts: Link plates and rollers are shot peened for greater fatigue strength.

FEATURES OF CHOHO SEAL-RING CHAIN:
 Between the inner and outer plate of the roller chain, there is a rubber seal ring, which can keep the dust outside and stop the grease running out, in this way even though we don't infuse the grease on the chain, the chain still can keep good lubrication. So the advantage of seal ring chain is No over-stretching; little noise; Long life-span; No frequently infusing grease.

CHOHO CHAINS NO.	PITCH	ROLLER DIAMETER	WIDTH BETWEEN INNER PLATES	PIN DIAMETER	PIN LENGTH	H = HEAVY DUTY		HX = HEAVY DUTY X RING		ULTIMATE TENSILE STRENGTH
						INNER PLATE DEPTH	PLATE THICKNESS	INNER PLATE DEPTH	PLATE THICKNESS
